# TriCaster® & Vizrt NRS

## 3 reasons to add Vizrt NRS to you TriCaster workflow and why is now the best time?

### 1. Year-End Budget Utilization & Future-Proofing

Many teams look to use remaining annual budget before it expires. Adding NRS now locks in essential infrastructure that improves asset management, searchability, and collaboration going into the next production cycle.

### 2. Streamlined Archive, Cleanup & Compliance

End of year is when productions archive, consolidate, and prep for the next season. Vizrt NRS simplifies media organization, centralizes storage, and ensures that nothing gets lost—making cleanup faster and more compliant.

### 3. Immediate Efficiency Gains for Q1 Productions

Deploy now, benefit immediately. With NRS, TriCaster teams start the new year with faster access to assets, improved remote workflows, and better content reuse—speeding up early-year projects without new workflow headaches.

## Oh and one last reason...

Vizrt are now offering some incredible end of year promotions on units that are ready to ship fast.

**NRSD-88TB** — $19,195

Save more than

### $2,600

- 88TB Capacity
- In stock and ready to ship, fast
