

STREAM DECK STUDIO

A GAME CHANGER FOR BROADCASTING

Scan for more info

Meet Stream Deck Studio, a hyper-customizable control surface powered by Bitfocus software. Streamline any workflow with its customizable LCD keys, intuitive navigation, and seamless integrations. Effortlessly organize commands, get instant feedback, and enjoy vast compatibility with hundreds of devices. Designed for pro broadcast environments, it's your key to flawless, efficient production.

HYPER-CUSTOMIZABLE

32 customizable LCD keys and dual multifunction encoders deliver precise, real-time control tailored to each workflow.

AUTO DEVICE ID

Utilizes mDNS and NMOS for seamless device identification.

BROAD COMPATIBILITY

Integrates with a vast and growing library of broadcast equipment.

SMOOTH OPERATIONS

Crosspoint routing, SNMP monitoring, KVM control.

INTUITIVE INTERFACE

Precise control and fluid navigation with real-time feedback.

POWERFUL SOFTWARE

Great with Bitfocus Companion, best with Bitfocus Buttons.

TAILORED PROFILES

NFC authentication facilitates access to personalized controls.

RACK READY

Slots into standard 19" racks, brackets included.

HYBRID WORKFLOWS

PoE+ and USB-C support enable simple deployment across both IP and traditional SDI workflows.

SCALABLE

Multi-device support and various software plans for growing business needs.

POWERED BY BITFOCUS

Stream Deck Studio is built to work seamlessly with Bitfocus software, delivering broadcast-grade control and reliability.

NATIVE BITFOCUS CONNECTION SUPPORT

Instantly unlock control of over 700 integrations with broadcast, AV, and production systems through Bitfocus Connections.

ONE INTERFACE, MANY SYSTEMS

Trigger video switchers, audio consoles, lighting, media servers, tally, and automation from a single control surface.

DESIGNED FOR PROFESSIONAL ENVIRONMENTS

Bitfocus software transforms Stream Deck Studio into a purpose-built broadcast controller, not just a desktop accessory.
